

## Covering block, marmoroc baltic

Colour concrete blocks for new builds and rebuilding. A complete façade system, including with exterior façade insulation. Type approved by Sitac according to BBR, sections 6:532, 5:63, 5:631 and BKR section 2:111 (Certificate No. 1356/70).

### Product description

Façade blocks of white crushed marble, white cement and pigment, with a water repellent outer surface. The blocks are hooked onto vertical profiles of galvanised steel plate (no sealing material or fixing devices required). Individual blocks can be easily replaced if damaged.

### MEASUREMENTS – WEIGHT

Length: 300 and 600 mm.

Constructional height: 100 mm.

Thickness: 25 mm.

Space requirement: c. 40 mm including 15 mm air space

Blocks with profiles weigh c. 34 kg/m<sup>2</sup>.

### APPEARANCE

The blocks are coloured throughout, with smooth or slightly textured surface and are available in 20 standard colours. Other colours can be ordered from the NCS colour range. The blocks have about 10 mm horizontal and about 5 mm vertical joint marking. Façade patterns can easily be built up using different formats and colours.

### Properties

#### FIRE

Incombustible material.

#### ENVIRONMENT

Made of crushed marble, cement and water.

### Planning guidelines

The steel profile is fixed directly to the substrate. A 15 mm ventilated air space is created between block and wall. A complete insulation system is available for exterior façade insulation (see separate report on the page on Marmoroc Support System). There are terminating profiles for windows, doors, foundation, eaves and fresh air intakes. Façade system for buildings up to 100 metres. Assembly instructions and detail drawings for termination to doors, windows, corners, foundation, eaves etc. can be ordered.
